

For hotels that are just getting started!

Costs and project timelines for installation will vary per location. It is important to have a general understanding of the installation process so you and your staff can avoid excessive spending of your time and money. Below is an overview of how to keep your EV charger project moving.

1 Request a site analysis from an electrician or contractor

Key elements to include on a site analysis are the existing electrical infrastructure, specifying available power capacity and proximity to power sources. Information about the layout of the parking areas, including the number of parking spaces and their distribution, is crucial for assessing the optimal charger placement. Additionally, the hotel owner should communicate any zoning regulations, permitting requirements, or specific design preferences.

2 Purchase your TurnOnGreen EV charger

Armed with this insight, you can confidently move forward in acquiring chargers that align perfectly with your hotel's needs. We're here to support you at every step of the procurement process and ensure a smooth transition towards offering cutting-edge EV charging services for your guests

3 Design, permitting, and approval

Our meticulous design assistance ensures optimal placement and adherence to local regulations. We also support you in the approval process with permitting authorities, streamlining the necessary permits and ensuring compliance. Rest assured, our collaborative approach helps lighten your workload, ensuring a smooth and efficient transition to offer state-of-the-art EV charging amenities at your hotel.

4 Installation

With the successful completion of the engineering, design, and approval processes, your hotel is now ready to move forward with the groundbreaking and installation phase of the EV charging project. Our team is here to provide ongoing support, guiding you through each step of the installation process. From breaking ground for necessary infrastructure to facilitating a smooth installation of the charging stations, we are committed to offering valuable assistance.

Ready to Charge!

TurnOnGreen electric vehicle chargers leave our warehouse pre-configured to your hotel's needs and ready to charge.

Once the chargers are "hot" as the electricians say, or powered, they are ready for service.

Work with your TurnOnGreen project manager to set permissions, pricing, and to learn more about how to manage your new EV charging amenity.
